  - Drawer Properties > Method
  - Selecting Drawer Depths
  - Custom Height Drawer - Add a Railing Set
- Inner Drawer previews
- Individual Roll Out Selections
  - Selecting Heights
  - Attach Roll Out to Front (Space Pantry)
  - Adjusting Drawer Depth)
  - Custom Height Roll Out - Add a Railing Set
  - Setting up a job to use Wooden Fronts on inner drawers
  - How much Clearance is needed on my inner drawers

## **Job Property Selections** - Cabinet > Construction > Drawer - Roll Outs

- Should be based on which drawer type is used most in your job

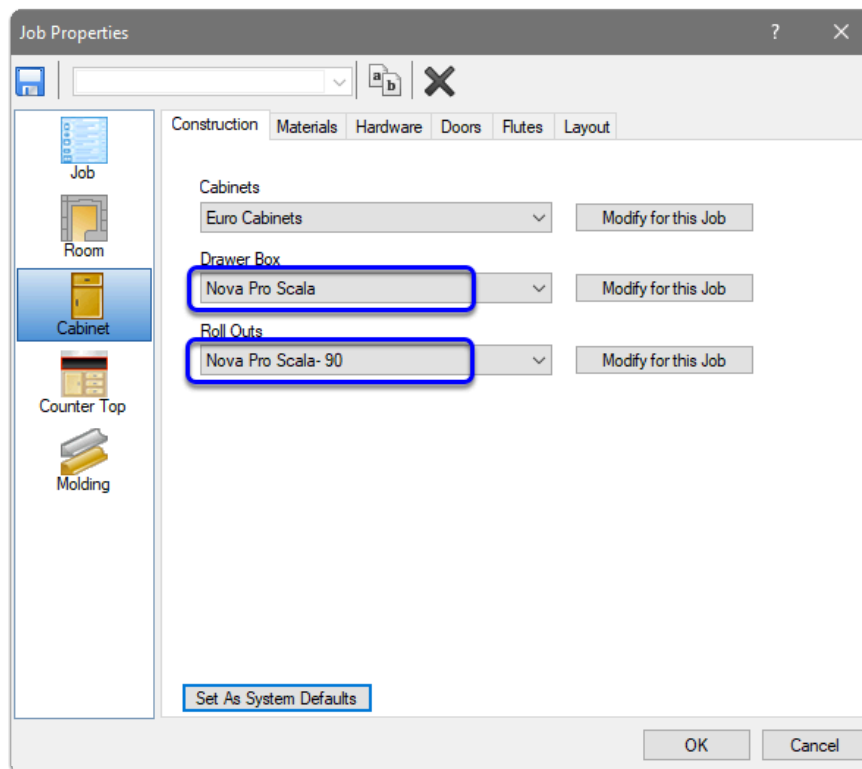

### a) Drawer Box

- Nova Pro Scala
- Nova Pro Scala 63 (Highest drawer in this construction is 63mm)
- Nova Pro Scala 90 (Highest drawer in this construction is 90mm)
- Nova Pro Scala 122 (Highest drawer in this construction is 122mm)
- Nova Pro Scala 186 (Highest drawer in this construction is 186mm)
- Nova Pro Scala Rail (Highest drawer is 186mm high with 90mm sides plus a rail set)
- Nova Pro Scala Crystal (Highest drawer is 186mm high with Crystal sides)
- Nova Pro Scala Crystal + (Highest drawer is 186mm high with Crystal + sides)

### b) Roll Outs

# Grass Nova Pro Scala Drawers - User Guide

- Nova Pro Scala- 63\* (Note: There is no Aluminium Front at this size)
- Nova Pro Scala- 90 (Single height inner drawer)
- Nova Pro Scala-122\* (Note: There is no Aluminium Front at this size)
- Nova Pro Scala-186 (Single height inner drawer)
- Nova Pro Scala-Rail (Single height 186mm inner drawer with 90mm sides plus a rail set)
- Nova Pro Scala-Crystal (Single height 186mm inner drawer with Crystal sides)
- Nova Pro Scala-Crystal + (Single height 186mm inner drawer with Crystal + sides)

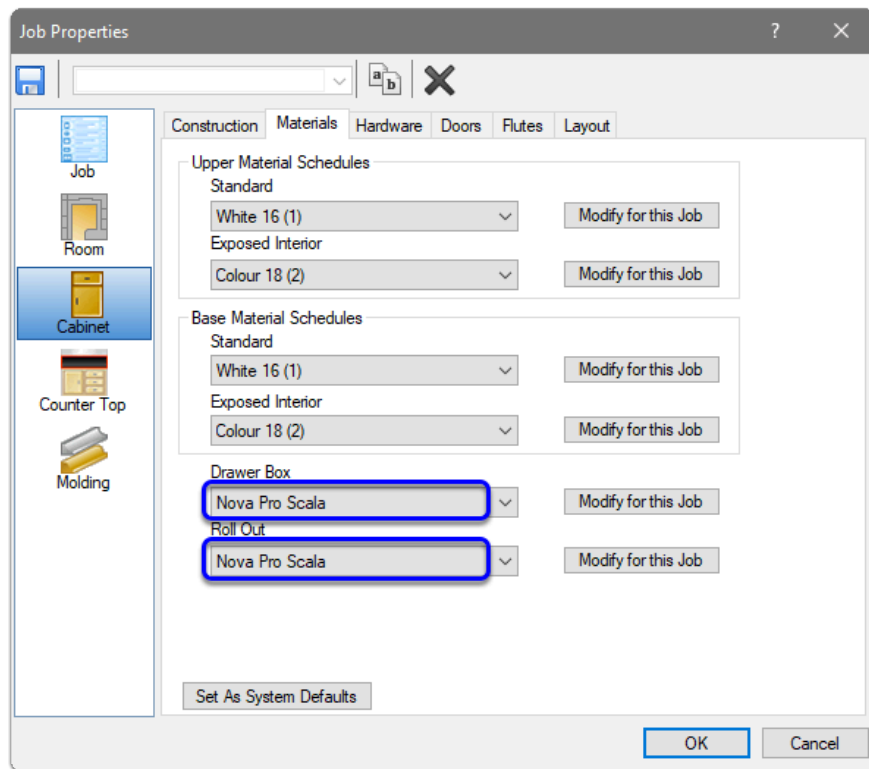

## Job Property Selections - Cabinet > Materials > Drawer Box - Roll Out

- There is only one option for Nova Pro Scala
- Modify for this job if you wish to change materials
- Example: Crystal and Crystal + side inserts - Change the Drawer Side and Roll Out Side materials
- Example: Drawer Bottom and Drawer Back materials

Apps to make Cabinet Vision work for you.

# Grass Nova Pro Scala Drawers - User Guide

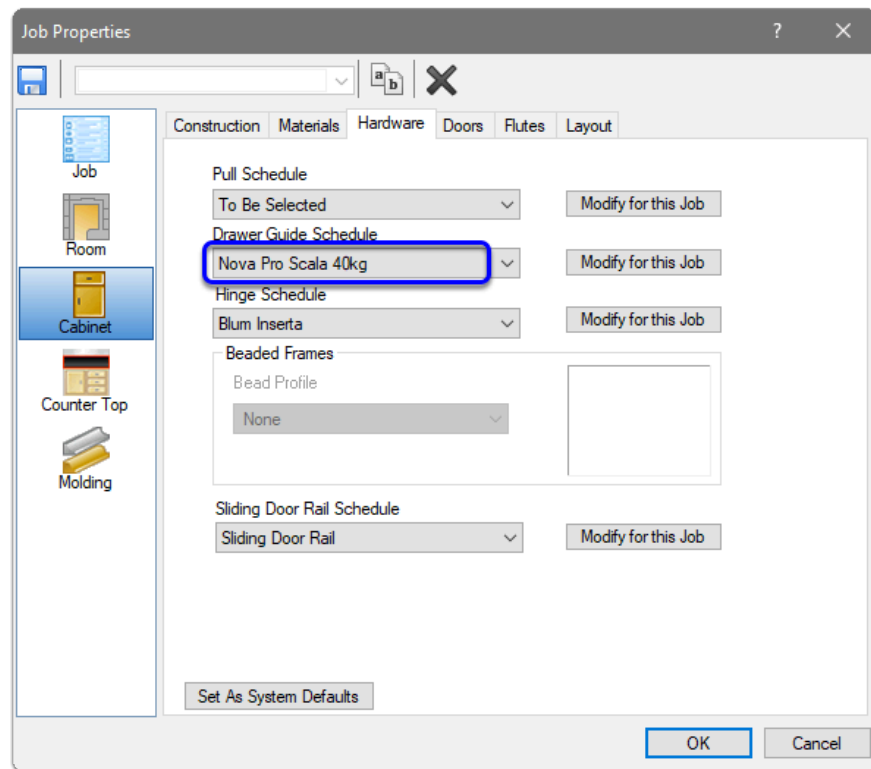

## Job Property Selections - Cabinet > Hardware > Drawer Guide Schedule

### a) Drawer Guide Schedule

- Nova Pro Scala 40kg (40kg drawer guides used wherever available)
- Nova Pro Scala 70kg (70kg drawer guides used wherever available)

# Grass Nova Pro Scala Drawers - User Guide

## Cabinet Level Selections for Drawers and Roll Outs (and Room level Selections)

- Construction, Material and Hardware selections for drawers and roll outs are the same options as shown in the Job Properties selections
- Job Properties is the best place to make selections
- If the room drawers differ to the Job Properties, Room Properties is the next best place to make selections
- If the cabinet drawers differ to Job Properties (or Room Properties), Cabinet Properties is the next best place to make selections

## Drawer Previews

- Drawers are allocated to drawer openings automatically
- The largest drawer that will fit will be used

a) The following image...

- Drawer 1 - 63mm
- Drawer 2 - 90mm
- Drawer 3 - 186mm
- Drawer 4 - Rail

## Individual Drawer Selections - Using clearances

- Assembly Level > Section View
- Using Top and Bottom Clearances in the **Drawer Section Editor**
- Estimate the space needed above a drawer using clearances to 'bump' down the drawers height

Apps to make Cabinet Vision work for you.

# Grass Nova Pro Scala Drawers - User Guide

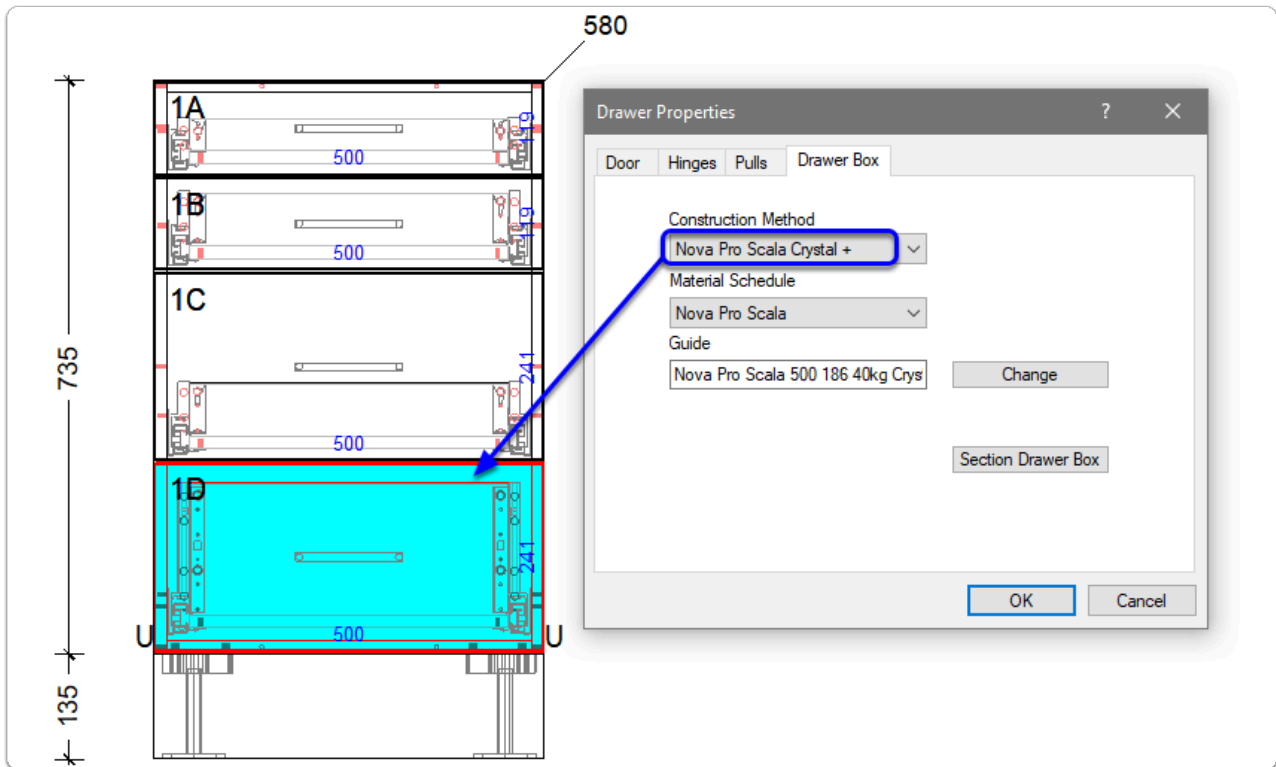

## Individual Drawer Selections - Using Drawer Properties

- Assembly Level > Section View
- Right Click Drawer > Properties > Drawer Properties > Drawer Box > Construction Method > Select the desired drawer

Apps to make Cabinet Vision work for you.

# Grass Nova Pro Scala Drawers - User Guide

## Individual Drawer Selections - Selecting Depths

- Assembly Level > Section View
- Left Click Drawer > Select Drawer Depth from drop-down on the side bar

Apps to make Cabinet Vision work for you.

# Grass Nova Pro Scala Drawers - User Guide

Custom Drawer Height and Adding a Rectangular Railing Set

Apps to make Cabinet Vision work for you.

# Grass Nova Pro Scala Drawers - User Guide

- Assembly Level > Orthographic View > Left Click the Drawer Front

Starting with a drawer that has the rail already is the way to have 2 x rail sets

Apps to make Cabinet Vision work for you.

# Grass Nova Pro Scala Drawers - User Guide

## Inner Drawer Previews

- Sizes shown in the following image have Scala Fronts available
- Nova Pro Scala- 90
- Nova Pro Scala-186
- Nova Pro Scala-Rail
- Nova Pro Scala-Crystal
- Nova Pro Scala-Crystal +

Apps to make Cabinet Vision work for you.

# Grass Nova Pro Scala Drawers - User Guide

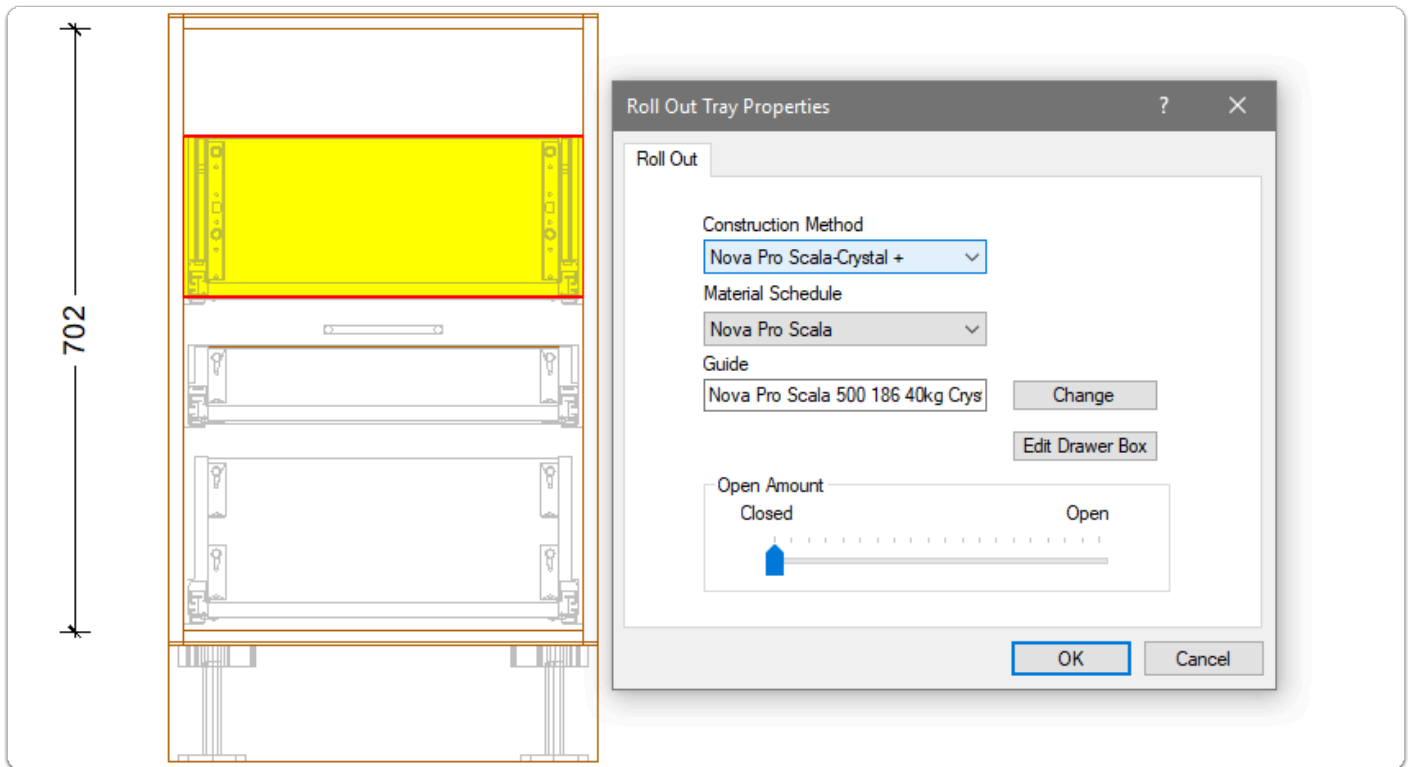

## Individual Roll Out Selections - Roll Out Properties

- Assembly Level > Section View > Section Interior
- Right Click Roll Out > Properties (or Double Left Click) > Roll Out > Construction Method
- In the following image I select Crystal +

Apps to make Cabinet Vision work for you.

# Grass Nova Pro Scala Drawers - User Guide

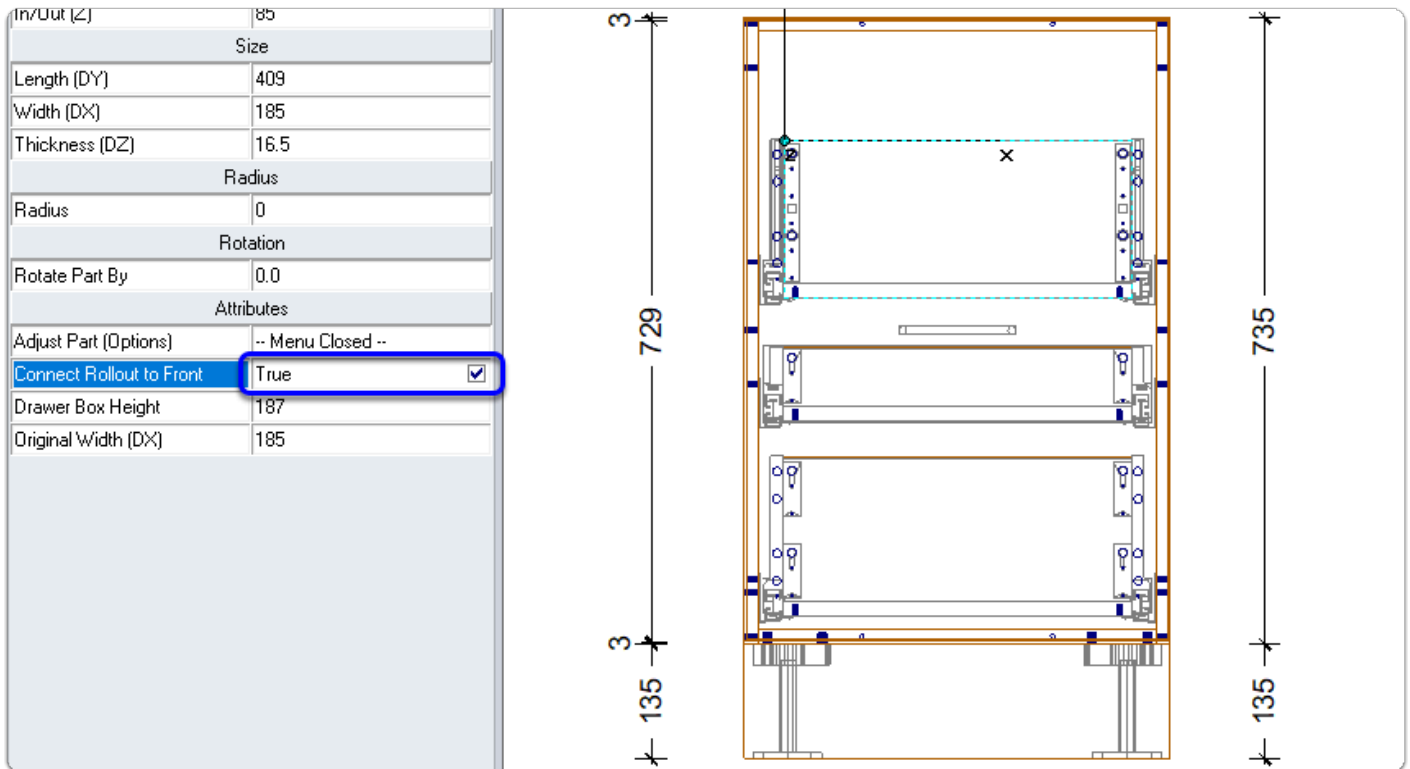

**💡 Connecting the Roll Out to the Drawer Front** is an easy way to make a '**Space Pantry**'

- Click on the Roll Out Back (ROBK) in one of the orthographic views
- Connect Roll Out to Front using Attribute on the side bar

Apps to make Cabinet Vision work for you.

# Grass Nova Pro Scala Drawers - User Guide

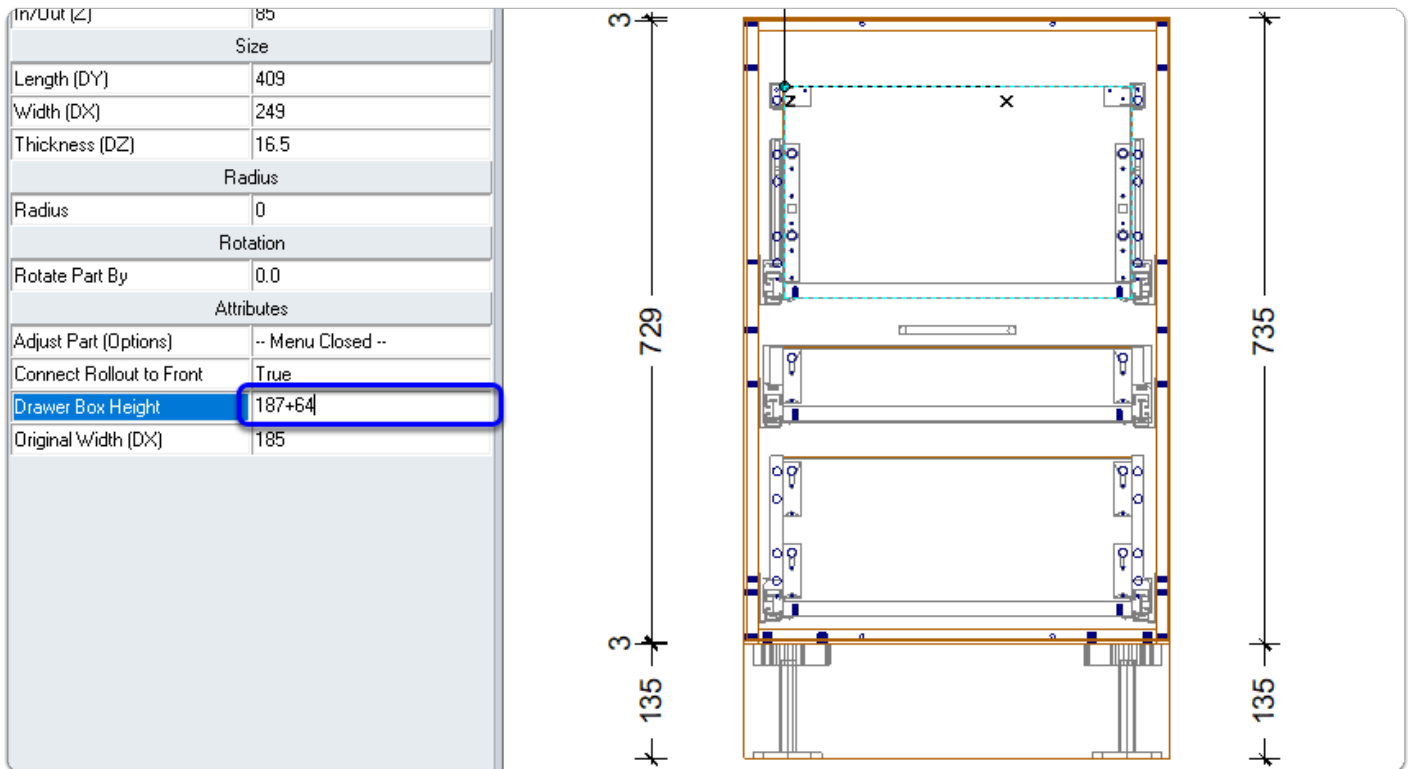

## 💡 Add a Railing Set while you are here

- In this example I add 64mm to the Drawer Box Height Attribute
- You can add a Rail Set to any drawer or Roll Out this way

Apps to make Cabinet Vision work for you.

## Setting up a job to use Wooden Fronts

- The following example is 'Modify for this Job' however its up to you whether you make this a global setting
- Roll Out Front Material
  - Job Properties > Cabinet > Material > Roll Out > Modify for this Job
  - Right Click the 'Roll Out Front' part and 'Match Parent Material'
- Roll Out Front Construction
  - Job Properties > Cabinet > Construction > Roll Outs > Modify for this Job
  - Run the General branch > Roll Out Setback (Set as desired)
  - Run Roll Out Front branch > Banding Definition
  - Select Roll Out Front from orthographic view > Set Drill Roll Out Front to True

Apps to make Cabinet Vision work for you.

## How do I know how much clearance is needed on my inner drawers?

- We have added the **Minimum Above** and **Minimum Below** values to the **Roll Out Guides**
- Left Click the ROG part in orthographic view
- Values are shown on the side bar
- Use these values in the Section Editor

Attributes	
Minimum Above Guide	5.5
Minimum Below Guide	16.5
